Grand Gedeh, Grand Kru, Lofa, Margibi, Maryland,
Montserrado, Nimba, River Gee, Rivercess, Sinoe

Co-coordinator at county level:

WASH CLUSTER MODEL - LIBERIA

Existing government coordination supported by WASH Cluster

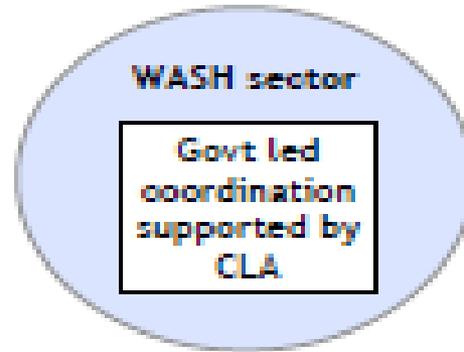

This assumes WASH Cluster coordination will be undertaken through an existing government-led coordination mechanism, with the WASH CLA providing support.

Avantages

- Builds on existing structure.
- Supports capacity building.
- Enables rapid broad participation.

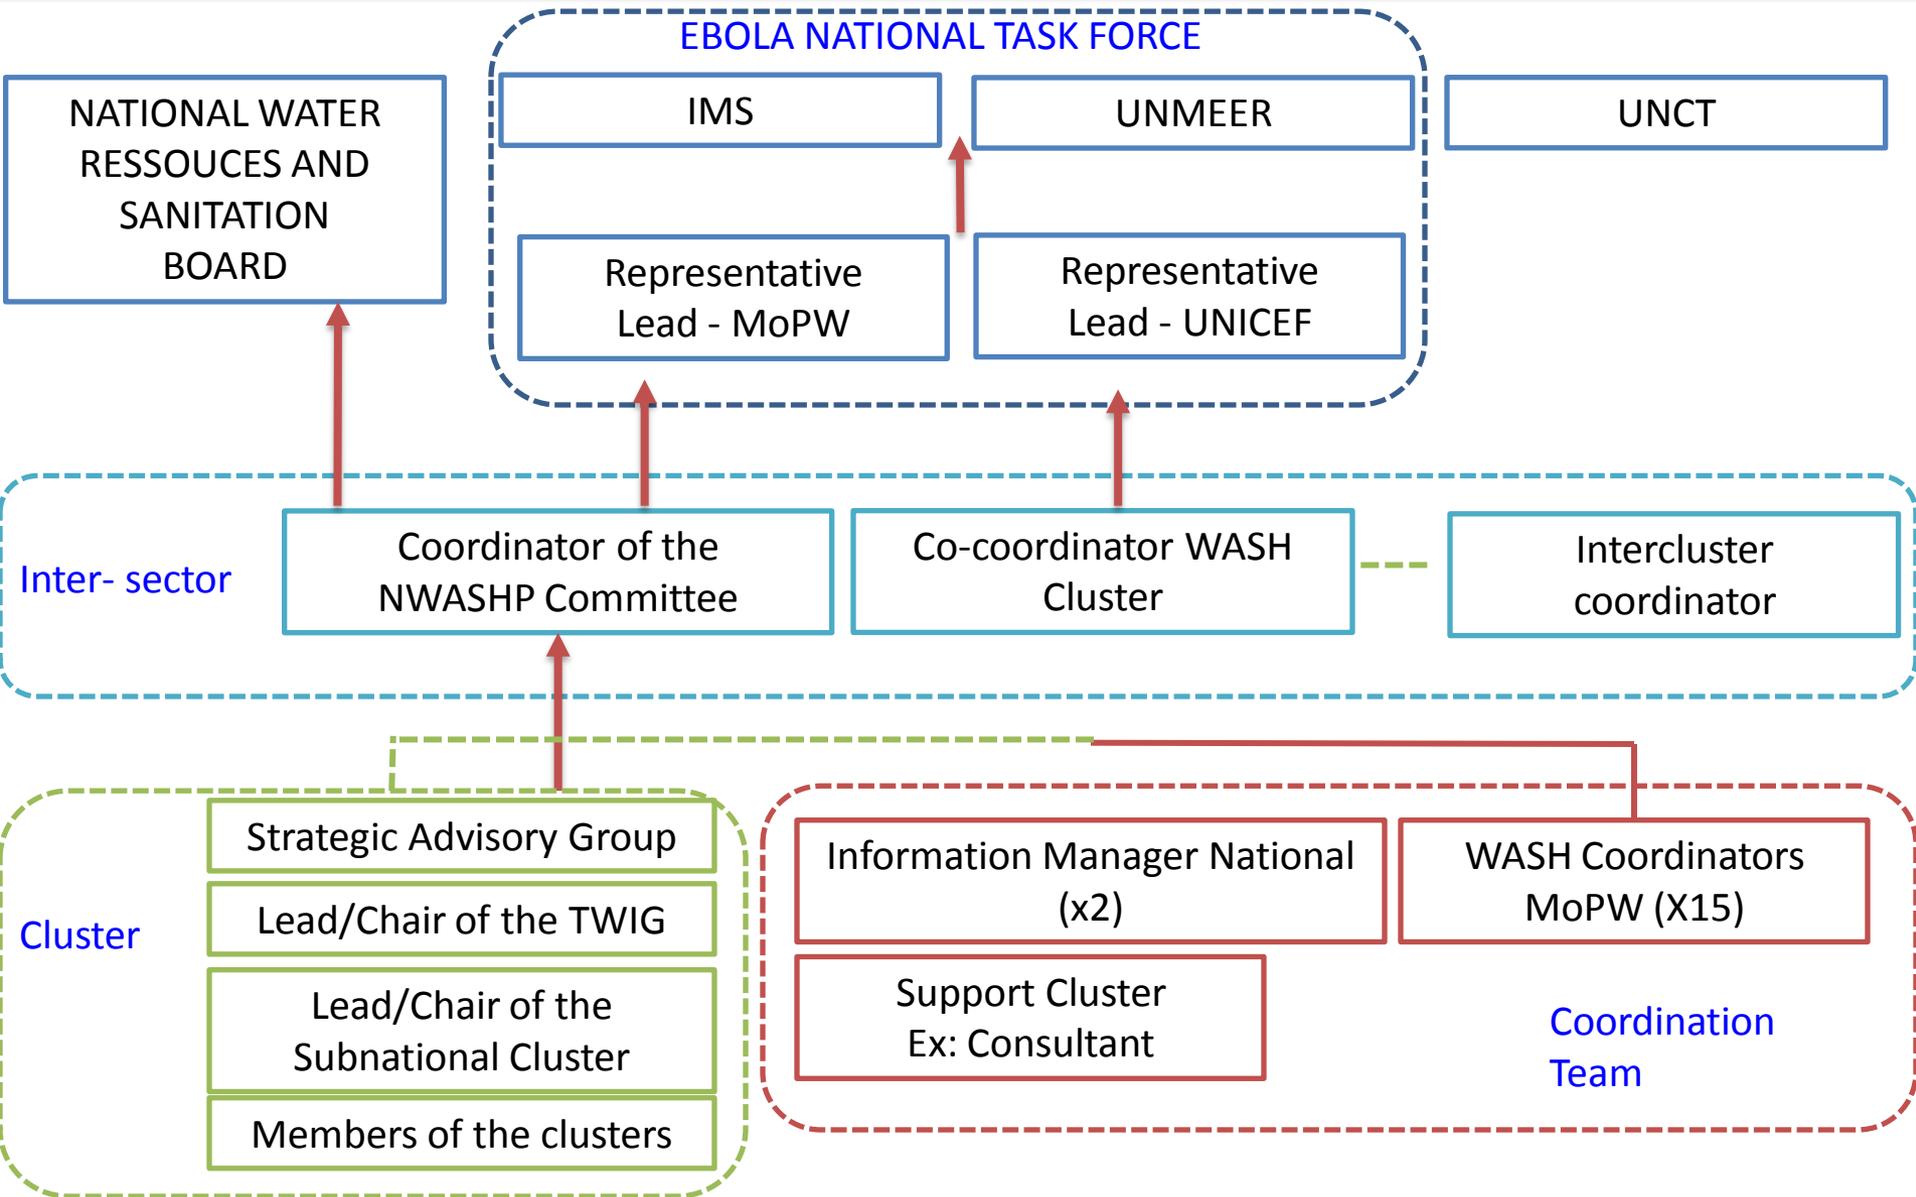

Coordination model

Disadvantages

- Steering and decision making processes may be slow authoritarian.
- May not have support of key WASH actors.
